

## MELALEUKA FARM

Melaleuka Farm is a family owned business with a long history in primary industry, in particular cattle farming. Our farm is located in the Peel Region of WA, some 80 kilometres south-east of Perth. At Melaleuka Farm we respect the animal and its welfare and do not use any antibiotics or hormones during the life cycle of our cattle.

Our beef is ID traced from the farm to our venues for quality assurance and provenance to ensure it is our beef going onto your plate. It is also accepted that beef with the right genetics, which is a characteristic common in certain breeds of cattle, especially the Akaushi or Red Wagyu, can provide a variety of health benefits, including but not limited to reducing your cholesterol. It is these health benefits that has led Professor Roger Dawkins and the team at the C.Y. O'Connor ERADE Foundation to create the "Healthy Beef Program" to further research and harness these attributes to provide a consistent product to the consumer which is commercially viable.

Across our venues our "food philosophy" is the same. We encompass a "nose to tail approach" to utilise the various beef cuts across the menu. This allows the chefs to use a range of cooking methods, cuts, flavours and textures to satisfy the season. Throughout the year we host a series of events that further highlight the versatility of not only our chefs but also our Melt Beef product.

### melt beef by melaleuka

**korean beef brisket tacos**, kimchee slaw, sriracha mayo (2) 14.9

## **di bella coffee**

All the coffee roasted by di bella is sourced through their crop to cup green bean buying programme. The crop to cup philosophy is about building direct relationships with coffee-growing communities and empowering them to work with us, rather than for us.

The programme is committed to building skills locally, providing job security for local workers and ensures that all crops selected are grown and farmed under ethical and sustainable conditions.
